QUARTERLY SUMMARY OF AUSTRALIAN STATISTICS

DECEMBER 1969 No. 274

Prepared under instructions from the Right Honourable the Treasurer by

K. M. ARCHER

COMMONWEALTH STATISTICIAN

The following symbols, where shown in columns of figures, mean:

- n.a. Not available.
- .. Nil or less than half the final digit shown, or not applicable.
- p Preliminary—figure or series subject to revision.
- r Figure or series revised since previous issue.
- Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g. 1968, refer to the year ended 31 December 1968; those shown as e.g. 1967-68, refer to the year ended 30 June 1968.

Any discrepancies between totals and sums of components in tables are due to rounding.

Values are shown in Australian dollars (\$) or cents (c).

FOREWORD

On page 146 are shown the dates of issue and prices of the latest printed publications issued by the Central Office of this Bureau. In addition, mimeographed publications are currently produced on the following subjects coming within the scope of the Quarterly Summary.

SECTION I. POPULATION AND VITAL STATISTICS

Population estimates are obtained by taking into account statistics of population increase in conjunction with the results of population censuses. For Australia as a whole, statistics of population increase take account of natural increase and net overseas migration.

The estimated population in each State or Territory represents the population ascertained at the Census plus recorded natural increase and recorded net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of State of residence under child endowment procedures or Commonwealth electoral procedures supplemented by results of any special count or sample survey. Holiday, business or other similar short-term movements between States and Territories are omitted. As records of migration by State or Territory are not complete, the estimated State and Territory populations so derived are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions were substantial after the 1966 Census.

As a consequence of the omission of holiday, business or other similar short-term movements between States and Territories the marked seasonal movements in the population of some States due to interstate holiday movements are not reflected in the estimates since June 1961. However, the following two aspects of seasonal movements are reflected in the estimated populations of the States.

- (i) People who were on holiday or other short-term travel interstate at the time of the Census are counted in the State where they spent Census night.
- (ii) There is some seasonal movement in the population of Australia as a whole which is due to movements of tourists and other visitors from overseas and of Australians travelling overseas for short periods.

The results of the 1966 Census have been taken into account in the preparation of these population estimates. Population estimates in issues prior to that for March quarter 1968 (No. 267), as well as the census populations at 30 June 1966 shown in Census publications, exclude particulars of full-blood Aborigines as required by Section 127 of the Constitution prior to its repeal in 1967.

Vital statistics for periods prior to 1967 exclude full-blood Aborigines. Differences between the statistics now published and those formerly published which implied the exclusion of Aboriginal vital events, cannot be taken as reliable statistics of births, deaths or marriages among full-blood Aborigines, because in many areas no satisfactory administrative or other basis existed for distinguishing vital events among full-blood Aborigines from those among part-Aborigines or the rest of the population.

(a) The figures shown relate to the capital city statistical division boundaries adopted at the 1966 Census for statistical purposes. The boundaries enclose areas expected to be in close economic and social contact with respective urban centres for the next two or three decades. An outline of the criteria used in determining these boundaries is given in 'Explanatory Notes on the Delimitation of Urban Boundaries for Statistical Purposes', Census Field Count Statement No. 4, pp. 2-4. (b) Greater Darwin area; the population of City of Darwin at 30 June 1968 was 22.2 thousand. Populations at 30 June 1969 were: Greater Darwin 30.1 thousand and City of Darwin 25.2 thousand. (c) Canberra Statistical District; includes the population of Queanbeyan (13.3 thousand) in New South Wales. The population of Canberra City District was 110.0 thousand at 30 June 1968 and 119.2 thousand at 1 July 1969 (population count).

⁽a) See footnote (a) on page 9. (b) Persons are asked on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. The statements represent the settlers' intentions at the time and may not be realised. This must be borne in mind in interpreting the statistics. The allocation to States and Territories in the table is based on these statements except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, are allocated, as far as is practicable, to the State or Territory of their placement from the centre. (c) Includes also persons passing through the migrant reception centre who were not placed in time for allocation to States.

⁽a) The figures in this table, except those relating to government employees, are based on comprehensive data from the Population Census of June 1961. Estimates for months subsequent to June 1961 are derived from current Payroll Tax returns, returns of Government employment, other direct records of employment, and estimates of the number of employees not covered by these collections. The figures are not directly comparable with statistics derived from the 1966 Population Census for which new workforce definitions were adopted. Estimates for June 1966 and subsequent months will be revised as soon as possible. The new series will be based on 1966 census benchmarks. In due course estimates for periods prior to the census of June 1966 will be revised, but on a basis comparable with that of the 1961 census benchmarks, the information needed to revise these benchmarks on the 1966 census basis not being available. (b) Employees in rural industry and private domestic service, and defence forces, are excluded. (c) Includes employees engaged in selling and distribution, etc', as well as those occupied directly in manufacturing activity. (d) Includes law and order, religion and social welfare, health services, education and other community and business services.

⁽a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes the Northern Territory and the Australian Capital Territory.

Note. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. Disputes not settled at the end of a quarter are not counted in the number of disputes for the following quarter, but additional workers involved and working days and wages lost are included.

⁽a) In some cases, union members in the Territories associated with State organisations are reported under the heading of that State. The annual figures reflect, in part, progressive movements to more accurate reporting and the comparability of totals for the Territories is affected by this aspect.

(b) Without interstate duplication. The State figures do not add to the Australian total because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

⁽a) This table does not supply a precise classification of trade union members by industry, because wherever members of a union are employed in a number of industries they have been classified to the predominant industry for the union concerned. Comparability between years of membership figures for an industry group may be affected by amalgamation of trade unions classified to different industry groups. (b) Without interstate duplication. See footnote (b) second table page 22. (c) Includes communication and municipal, etc. (d) Includes community and business services.

SECTION V. CAPITAL EXPENDITURE BY PRIVATE BUSINESSES

These statistics are designed primarily to measure trends in expenditure by private businesses on fixed tangible assets. The statistics are based on returns obtained from private businesses subject to pay-roll tax (other than businesses in rural, professional, gas and electricity industries), from government banks and airlines, and from other businesses not subject to pay-roll tax which undertake projects of more than \$500,000 in any half year. For statistics of capital expenditure by all private businesses, see the series 'Gross fixed capital expenditure' on page 91 of this publication.

SECTION VII. RETAIL SALES

Figures in the next two tables relate to retail sales of goods (as distinct from services, accommodation, entertainment, meals, etc.) by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards). The figures for the year 1961-62 were obtained from a Census taken in respect of that year, whereas figures for the other periods shown are estimates based on sample surveys.

All figures shown are on a basis comparable with the 1961-62 Retail Census.

INSTALMENT CREDIT FOR RETAIL SALES FINANCED BY NON-RETAIL FINANCE BUSINESSES AND RETAIL BUSINESSES

The statistics in the following tables cover instalment credit schemes which relate primarily to the financing of retail sales of goods. In general 'instalment credit' is defined as relating to schemes in which repayment is made by regular pre-determined instalments, and includes hire-purchase, time payment, budget account, and personal loan schemes which relate primarily to financing of retail sales of goods. The following tables include all such credit, whether it is advanced by retail businesses (including finance subsidiaries of retail businesses) or by non-retail finance businesses.

⁽a) For current account balances minus sign (—) denotes deficit; for capital inflow minus sign (—) denotes outflow; for official monetary movements minus sign (—) denotes decrease in international reserves or net I.M.F. position or an increase in net liabilities of the Reserve Bank to foreign central banks. (b) Recorded trade figures adjusted in respect of coverage and valuation for balance of payments purposes. (c) Particulars of the Survey of Overseas Investment are not yet available for the Sept. quarter 1969 or for the year 1968-69 and for these periods the items marked (*) are included with the balancing item. (d) Excludes items marked (*). (e) Includes items marked (*). (f) Excludes a reduction of \$113 million in the Australian dollar equivalent during November 1967 due to the devaluation of the pound sterling and a number of other currencies held as part of Australia's international reserves. See footnote (a) to following table.

⁽a) The changes in total holdings shown in this table equal the changes in international reserves shown in the balance of payments, except for rounding discrepancies and for periods in which the rates of exchange of the currencies held as reserves changed relative to the Australian dollar. For periods in which these rates are altered, the changes in the Australian dollar equivalent of the reserve holdings caused by these valuation changes are reflected in the changes in total holdings shown in this table, but are not included in the change in international reserves shown in the balance of payments tables. Thus for the year ended June 1968 the fall in the Australian dollar equivalent of total reserve holdings shown in the above table of \$102 million includes a loss of approximately \$113 million resulting from the devaluation of the pound sterling and other currencies in November 1967 as well as a net addition of \$10 million resulting from Australia's balance of payments transactions. The change in international reserves shown in the balance of payments transactions. (b) Last Wednesday of month.

NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the 'investing public' includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdrafts, loans to authorised dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) Assessments issued during year 1968-69. (b) Exemption allowable where whole of estate passes to widow or widower, children or grandchildren, is \$20,000 decreasing by \$2 for every \$8 in excess of \$20,000. Where estate does not pass to widow, etc., exemption is \$10,000 decreasing by \$2 for every \$8 in excess of \$10,000. (c) Dutiable value is gross value as assessed less debts and charges, state probate and succession duties, exempt estate and statutory exemption. Rates of duty range from 3.0 per cent on \$20,000 and under to 27.9 per cent on \$1,000,000 and over.

COMMONWEALTH SALES TAX—SALES OF GOODS AND TAX PAYABLE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustments to be made to the crude figures on this account.

Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, financial assistance grants, special purposes payments grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated. (c) Includes territories taxation receipts. (d) Includes advances and payments to State trust funds. (e) Excludes interest, etc., charges. (f) Includes loss by Transport Commission and working expenses of Metropolitan Transport Trust.

⁽a) In addition, special benefit payments to migrants in Commonwealth centres or hostels, awaiting their first placement in employment in Australia were 1964-65. \$23,000; 1965-66. \$65,000; 1966-67, \$122,000, 1967-68. \$128,000; 1968-69, \$237,000; quarter ended September 1969, \$56,000.

(b) From June 1968, special benefits became payable to confinement cases in lieu of sickness or unemployment benefits.

Note. The rates of benefit per week from 29 September 1969 are \$10 for a married person or an unmarried adult, plus \$7 for dependent spouse, \$2.50 for the first child under 16 years of age and \$3.50 for each subsequent child under 16 years; for unmarried juveniles \$4.50 if under 18 years and \$6 if 18 and under 19 years. In certain cases \$7 per week might be paid in respect of claimant's housekeeper. Permissible weekly income from other sources is \$6 for adults and married persons and \$3 for unmarried persons under 21. For unemployment benefit, permissible income means income of claimant and spouse; for sickness benefit, permissible income means income of claimant only. There is a waiting period of seven days for which no payment is made. A special ordinary benefit (See above) may be granted to a person not qualified for an unemployment or sickness benefit if, because of age, physical or mental disability or domestic circumstances, or for any other reason, he us unable to earn a sufficient livelihood for himself and his dependants.

⁽a) Teachers-in-training are generally excluded. (b) The methods used for calculating equivalent full-time units of part-time teaching vary from State to State, between government and non-government schools and between primary and secondary schools within States. For most schools the information is based on either the total hours worked or total number of class periods taken in a week by part-time teachers in relation to the normal hours worked or periods taken by full-time teachers. (c) New South Wales includes all teachers on leave. (d) Victoria excludes all teachers on leave for whom temporary replacements have been made. (e) If a full-time teacher both senior and junior technical school pupils, he is counted as part-time in these statistics (which include junior technical, but not senior technical schools), if his teaching load in the junior school is less than 75 per cent. (f) Visiting teachers who attend more than one school are counted as part-time in each school visited. (g) Unqualified teachers and teaching assistants at mission schools are excluded.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by the total number of civilian employees expressed in male units, i.e. total male employees plus 55 per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes Northern Territory.

Quarterly figures are affected by seasonal influences. Comparisons as to trend are generally best made by relating complete years or corresponding periods of incomplete years. However, from December quarter 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks. Indexes of average weekly earnings, seasonally adjusted, are shown in the next table. There has been no change in the basis of seasonal adjustment of these series. They have not yet been adjusted by the programs used for other Bureau series, as described in 'Seasonally Adjusted Indicators, 1969', issued on 22 May 1969.

⁽a) See footnote (a) to table above. (b) Average earnings per employed male unit. Based on payroll tax returns and other data. (c) The index for manufacturing industries for the years 1960-61 to 1967-68 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses. The figures from September quarter 1968 are interim estimates based on payroll tax returns and are subject to revision when the Factory Census for 1968-69 is tabulated.

INDEXES OF WAGE RATES AND HOURS OF WORK

The indexes of weighted average minimum weekly and hourly wage rates and standard hours of work shown on this and the following two pages are based, in the main, on the occupation structure existing in 1954.

Each of the occupations included in the indexes is individually weighted. From the wage rates and hours of work for these occupations, weighted averages are calculated for each industry and for all groups.

In the following tables the weighted averages so calculated are shown in dollars and cents and also as index numbers with the weighted average for the year 1954 as base (=100).

For details of wage rates and index numbers from 1939 references should be made to the following bulletins: *Minimum Wage Rates, March* 1939 to *June* 1965 (ref. No. 6.17) *Wage Rates Indexes, June* 1965 to *June* 1968 (ref. No. 6.21). Figures for months subsequent to June 1968 will be found in the monthly bulletins, *Wage Rates and Earnings* (ref. No. 6.16) commencing with the June 1969 issue.

WEEKLY WAGE RATES(a): ALL GROUPS

Indexes of weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and agreements, and index numbers of wage rates.

⁽a) The amounts shown should not be regarded as actual current averages, but as indexes expressed in money and hour terms, indicative of trends. Figures are subject to revision. (b) For mining, the average rates of wage and hours are those prevailing at the principal mining centres in each State. (c) Average rates of wage are for occupations other than masters, officers and engineers in the Merchant Marine Service, and include value of keep, where supplied. (d) Excludes rural. (e) Excludes rural, and shipping and stevedoring. The former is not included in the Wage Rates Indexes and for the latter definite particulars for the computation of average hours of work and hourly rates of wage are not available. (f) Excludes rural; mining and quarrying; and building and construction.

BASIC WAGE—WEEKLY RATES FOR ADULT MALES UNDER AWARDS OF COMMONWEALTH CONCILIATION AND ARBITRATION COMMISSION

In June 1967 the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Consequently the table of Commonwealth basic wages previously shown in this publication has been discontinued. (See Note below.)

STATE BASIC WAGES: WEEKLY RATES

Basic wage rates still operate in awards, determinations, etc., of State industrial tribunals in all States except Victoria and these rates are shown in the table below.(a)

Note. Details of general increases in award 'total wages' in Commonwealth awards and in Victorian Wages Board determinations, and details of rates of minimum wage for adult males prescribed in Commonwealth and State awards are shown in the monthly bulletin, *Wage Rates and Earnings*.

CONSUMER PRICE INDEX: GROUP INDEX NUMBERS

Six State capital cities and Canberra

(Base of each index: year 1966-67 = 100.0)(a)

The Consumer Price Index has been compiled for periods from September quarter 1948. A detailed description of the index is contained in Labour Report, No. 52, 1965 and 1966.

The fifth link was effected as at December quarter 1968 and at the same time the reference base year was changed to 1966-67. For further details *see* statistical bulletin 'Consumer Price Index, March quarter 1969' (Ref. No. 9.1).

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

Note. The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

Note. The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

The weighting system adopted in this index is based on estimates of the average annual consumption of included commodities in Australia in 1928–29 to 1934–35. The validity of the weighting and the representativeness of the index have become increasingly affected by changes in usage and in industrial structure. New series of wholesale price index numbers relating to materials used and articles produced by defined areas of the economy are being developed. The first of these indexes, referring to materials used in building other than house building, was published in statistical bulletin (ref. No. 9.6) of 23 April 1969 (see also pages 143 and 144). Work continues on the preparation of two further measures, relating to materials used in house building and in manufacturing industry respectively. Taken together these first three series will, to a considerable extent, constitute a currently representative replacement for the Wholesale Price (Basic Materials and Foodstuffs) Index, which in the meantime will continue to be published in the shortened form shown below. This is to meet the needs of those who, for special purposes, require the particular indexes included. However, it should be noted that the Building Materials group has been largely superseded by the new index referred to above.

Commodities in the Wholesale Price (Basic Materials and Foodstuffs) Index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from

manufacturers and merchants.

FARM PRODUCTION PRICE INDEXES

The annual indexes shown in the following table relate to average 'prices' of farm products realised in the principal markets of Australia. The 'price' data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the indexes therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The indexes for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes shown below are the revised series (December 1952) in which average quantities of each

product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.
